

NORTH CAROLINA'S LISTED FEDERAL ACTIONS

DIRECT FEDERAL ACTIVITY

The following Federal activities will be reviewed by the State coastal management program for consistency:

- All actions occurring within or adjacent to areas of environmental concern (AECs occur within the coastal zone).
- All purchases, sales or leases of Federal real property above 20 acres in size (within the coastal zone).
- Construction of major facilities (20 acres disturbed or 60,000 square feet) significantly affecting the coastal zone.
- Federal development projects occurring in or significantly affecting the coastal zone (e.g., Erosion Control, Flood Control and Navigation Projects).
- All actions of regional or interstate significance.
- Activities on Federal property that result in significant impacts on the coastal zone.*

*Projects with probable significant impact should be identified through criteria arrived at by the State and Federal agency mutually in the process of consultation.

GEOGRAPHIC LOCATION DESCRIPTION

- Landward: Any major river basin that intersects the State's coastal area. These river basins include: Lumber, Cape Fear, White Oak, Neuse, Tar-Pamlico, Roanoke, Chowan, and Pasquotank.
- Seaward: Waters off the coast out to 200 miles

An activity need not occur within the coastal area to be subject to routine consistency review. The State will routinely review for consistency with the State's enforceable policies licenses or permits for projects located in whole or in part within any major river basin in the State that intersects the coastal area or for activities associated with such projects. The river basins that intersect the coastal area are: Lumber, Cape Fear, White Oak, Neuse, Tar-Pamlico, Roanoke, Chowan and Pasquotank. Alternatively, this area can be described as all area within the State east of the eastern boundary of the Yadkin River basin. Of course, an activity must be reasonably likely to affect any land or water use or natural resource of the coastal area in order to be subject to the consistency process. For projects not subject to the State's routine consistency review, the State reserves the right under 15 C.F.R. § 930.54 to request from OCRM consistency review authority on a case-by-case basis.

North Carolina also will review for consistency federal licenses or permits for projects that occur in federal waters off the coast of North Carolina. The State will review routinely such licenses or permits if the project is located, at least in part, within 200 miles of North Carolina's coastal area, but not if the project occurs entirely within another State. As with land-based projects, the State's review will be limited to activities that are reasonably likely to affect any land or water use or natural resource of the coastal area. As above, for projects not subject to the State's routine consistency review, the State reserves the right under 15 C.P.R. § 930.54 to request from OCRM consistency review authority on a case-by-case basis.
