Re: **2nd comment** Proposal to Defund Oregon "Coastal Zone Management Act"

Dear Ms. Gore,

Funding Oregon Coastal Zone Management Act should be contingent on developing and implementing an Invertebrate Species Plan for all freshwater and saltwater areas. This plan would include creeks, streams, rivers, ponds, lakes, bays, estuaries and near shore marine. The purpose of this plan would be to identify and correct environmental problems. This plan would establish much needed baseline information that is needed to measure the health of the ecosystem. This plan would help identify problems in the early stages before they effect more complex living organisms.
